SWEDEN

INTRODUCTION

The Kingdom of Sweden is a limited constitutional monarchy located in northern Europe, between Norway and Finland. It has an area of 173, 745 sq. miles. A population of 9.5 million people. The capital is Stockholm. Its major industries are mining, lumber, wood pulp and motor vehicles. Modern

Sweden had its beginning in 1523, When Gustavus Vasa drove the Danes out of Sweden. Sweden has been a major producer of rifles, shotguns and military weapons, as well as ammunition for many years. However they have not been a producer of .22s. All of the .22s of Sweden have been produced by manufacturers in other countries as a private label for their arms and ammunition producers.

HUSQVARNA. Located in Husqvarna, this has been a major producer of guns, but they have never produced .22s. They have from time to time had some private label boxes produced for them. They are still in business.

NORMA PROJEKTILFABRIK. Located in Amotfors. This company became Norma AB, but when and the rest of the history of this company is not known at this time. It is not known if they produced .22s or not but they did produce rimfires. No boxes are known from this company.

FFV NORMA AB. Located in Amotfors. The history of this company is not known. It is the successor company to Norma Projekttilfabrik. They are a major producer of center fire ammunition and a also a major exporter of ammunition. To the knowledge of the cataloger, they have never produced .22s. They have had .22s produced under their label by Fiocchi of Italy. They are still in business.
